## EUR 3.8 million for further growth of CUREOSITY

**Düsseldorf (06-24-2024)** CUREosity GmbH, the innovative MedTech company from Düsseldorf, announces the successful conclusion of a growth financing round. A total of 3.8 million euros was committed by existing and new investors in the completed growth financing round. Caesar van Heyningen (CEO): "The current successful course – consisting of scaling markets and high-quality updates of our therapy software – is strengthened by this financing. We plan to invest heavily in commercial expansion, incorporating tomorrow's technological possibilities into our product roadmap today. With this financing round, we can ensure financial independence and sustainable business operations. A privilege – especially in tight market conditions."

With the signing and notarization, it has been official since June 21, 2024: With 3.8 million euros in equity, CUREOSITY can continue to grow sustainably in the future. The dedicated team has already come a long way with CUREOSITY: Since the market launch of the virtual reality therapy (VR therapy) CUREO®, the software-as-a-service company has grown strongly and is now in use in almost 200 therapeutic facilities. The additional capital will be used, among other things, to further expand CUREO®'s market leadership in the field of VR therapy.

Among others, the existing investor TechVision Fonds (TVF) and the Belgian family office Nomainvest have contributed as new co-investors. The venture capital fund TVF, based in Aachen, specializes in companies in the medical technology sector and has been supporting CUREOSITY since 2021. Björn Lang, Partner at TVF: "CUREOSITY solves the problem of the shortage of skilled workers in the field of therapy. Especially due to demographic change, smart solutions like CUREO® VR therapy are highly relevant to society. We look forward to participating in the solutions and successes in the future."

The growth financing round was accompanied by the law firms ADVANT Beiten and Forvis Mazars, whom CUREOSITY would like to thank for their productive and successful collaboration.

### About CUREOSITY

CUREosity GmbH, with headquarters in Düsseldorf and almost 50 employees at site, is revolutionizing rehabilitation by developing innovative therapy concepts based on virtual reality and gamification. The idea for the CUREO® therapy software arose from a personal need of the three founders and the software is now used in 24 countries worldwide.

CUREO® combines neuroscientific findings, particularly the potential of neuroplasticity, with many years of therapy experience and the technical and creative know-how of the developers.

The 50 trainings in 7 modules can be used in physiotherapy, occupational therapy, and neuropsychology across all phases and regardless of location and are aimed at people with sensorimotor, cognitive and perceptual impairments.
